PROFESSIONAL SUMMARY

Full Stack Developer and AI Solutions Analyst delivering secure enterprise systems and custom AI-powered workflows in regulated environments. Early career professional with a track record of leading multiple \$2M+ software projects, delivering 100+ features, and completing three production go-lives for 5000+ internal business users. Expertise in C#, .NET, React, TypeScript, and Python, with proven success integrating advanced LLM capabilities to automate complex processes and scale intelligent tools across the full software development lifecycle.

Technical Skills

- **Languages:** CSharp (C#), TypeScript, JavaScript, Python, Java, Structured Query Language (SQL)
- **Frameworks/Libraries:** .NET, React, Flask, Express, Django, Apps Script, Scikit-learn, PyTorch, Google Apps Script
- **Tools/Platforms:** Google Cloud, Vertex AI, Azure, Azure AI Foundry, Amazon Web Services (AWS), Docker, GitHub, Playwright, LangChain, nodemation (n8n)
- **Systems/Practices:** Agile, DevOps, QA Testing, Requirements Gathering, Documentation, Role Based Access Control (RBAC), Continuous Integration and Continuous Delivery (CI/CD)

Experience

Sanmina | *AI Solutions Analyst*

May 2026 - Present

- **Design and architect custom AI-powered workflows** within the Google Workspace ecosystem, utilizing **Python** and **Google Apps Script** to automate manual internal processes and enhance operational productivity across manufacturing departments.
- **Integrate advanced LLM capabilities** into existing business systems using **Google Gemini APIs** and **Vertex AI**, transitioning complex administrative bottlenecks into scalable, intelligent tools from initial prototyping to full-scale implementation.
- **Collaborate with cross-functional teams** using Agile and requirements-gathering practices to identify innovation opportunities, serve as the primary AI subject-matter expert, and maintain rigorous testing, debugging, and documentation standards, resulting in faster delivery of AI solutions and higher documentation quality

QatarEnergy LNG | *Full-Stack Software Engineer / Application Analyst II*

Apr 2025 - May 2026

- **Co-Led the end-to-end delivery of two concurrent \$2M** software projects in a regulated environment, executing 20+ on-time deployments and three production go-lives while serving as the primary SME for business-critical applications.
- **Optimized system performance and team efficiency** by reducing application response times from 10 seconds to 1 second, establishing reusable React/TypeScript UI standards for a six-developer team, and architecting a Playwright QA framework.
- **Designed AI proof-of-concepts** using LangChain, n8n, and Azure AI Foundry to automate workflows and prototype Retrieval-Augmented Generation AI solutions, producing proof-of-concept reports that informed senior leadership decisions on AI adoption.

Hamad Medical Corporation | *IT Specialist Internship*

Jan 2021 - May 2021

- Supported hospital IT infrastructure, CCTV networks, database systems, and medical equipment connectivity using Python scripts and Role-Based Access Control, which helped lower system downtime and improve overall reliability
- Assisted with troubleshooting, routine maintenance, and data integrity checks to reduce downtime and improve operational reliability

Education

University of Sussex

Dec 2021 - Jul 2024

Bachelor of Science, Computer Science (GPA: 3.5 GPA)

United Kingdom

- **Achievements:** Earned Upper Second-Class Honours (2:1) (3.5 GPA), Dissertation: "Time Flies" focused on Artificial Intelligence and Neuroscience

Certifications

- PeopleCert, ITIL 4 Foundation: Dec 2025 - Jan 2026. Certified in modern Information Technology (IT) service management, continuous improvement, and delivery of high-quality technical services
- Caltech CTME, Artificial Intelligence and Machine Learning: Sep 2025 - Oct 2025. Completed a 240-hour in-person Artificial Intelligence (AI) / Machine Learning (ML) bootcamp covering machine learning, deep learning, Natural Language Processing (NLP), generative AI, Retrieval-Augmented Generation (RAG) / Large Language Model (LLM) applications, and deployment concepts. Built 4 hands-on projects, including a capstone time-series forecasting dashboard for seasonal staffing demand and Service Level Agreement (SLA) planning. Led a 7-member capstone team; project recognized as a top-performing submission for technical quality, business relevance, and presentation.
- Codecademy, Computer Programming and General IT: January 2022 - Present. Ongoing self-directed learning in software development, computer science, and Information Technology (IT). Completed courses in CSharp (C#), Python, Java, React, Cascading Style Sheets (CSS), Agile, Command Line, TensorFlow, OpenAI Application Programming Interface (API) development, and computer science fundamentals.
